

PORTABLE SCANNERS & PRINTERS

PORTABLE SCANNER

If you need to scan on the go, consider the [Ricoh ScanSnap ix1300](#) or [ScanSnap ix100](#). These are full-fledged scanners, yet small enough to be portable. The ix100 is even battery-powered for truly remote scanning.

Alternately, if you have a modern smartphone, you already carry an excellent camera and a scanner in your pocket or purse. Look at document scanning apps. Many apps have document scanning tools built-in, including [Apple Notes](#), [Dropbox](#), [OneDrive](#), and [Clio for Clients](#). Check the apps you use, particularly note-taking apps like OneNote (combined with [Microsoft Lens](#)), to see if a scanner tool already exists.

If you'd like a more feature-rich, scanner-specific app, our recommendation for iOS users is [Scanner Pro](#) from [Readdle](#). An alternative, multi-platform solution is [SwiftScan](#). It works on [iOS](#) and [Android](#). Both products offer multipage documents, optical character recognition, and document storage and sharing through all major cloud storage vendors. As for cost, both products offer a free version to try. Scanner Pro provides additional features at \$7/mo. For SwiftScan, \$35/yr unlocks all the features.

PORTABLE PRINTERS

You will not be surprised that you also have portable printer options. For example:
